NOTES

Total raw scores (sheet 2006 Z scores column N) include the weightings of 2.5 for TQA, 1.5 for RAE and 1 for all other indicators

Note that the -1 weighting to SSR is applied in the Z scores column E

Overall total score (sheet 2006 raw scores column K) has been formed by:

Rescaling the total raw scores by adding twice the absolute size of the minimum score to every score (sheet 2006 Z scores column O).

Scores are then expressed as a % of the transformed maximum multiplied by 10.

Footnotes

TQA teaching scores have been re-estimated this year

RAE are taken from last year

Entry Entry standards are now the new A level tariff system for English, Welsh and Irish institutions.

In Scotland the tariff score for A levels and that for the highers have been amalgamated to estimate a weighted average.

SSR Teesside provided revisions directly

Lib/comp Hull, Middlesex, Roehampton, UWIC Cardiff and Cambridge all provided revisions directly

Facilities Abertay Dundee, De Montfort, Lincoln, Oxford Brookes, Roehampton and UWIC Cardiff all provided revisions directly

Good honours

Graduate prospects Keele and Central Lancs provided revisions directly, Cardiff made a small revision

Completion Completion is computed from table 5 of the performance indicators on the HESA website (student who started their degree 2001-02)

The number who are projected to finish their degree or transferred are expressed as a percentage of themselves plus those projected neither an award nor transfer and those who received another award A weighted average was computed for Cardiff and Manchester based on their constituent merger institutions De Montfort and Teesside use figures from the previous year (students who started their degree 2000-01)

Final data for LSE and Bangor were provided directly from institution

For the second year running, London Metropolitan University refused to allow the release of data. Last year, the reason given was that the figures related to the two universities which merged to form it and not to LMU itself. There is no such excuse this

year. It was ranked 98th in the 2004 edition
